

TECHNICAL INFORMATION BULLETIN  
 FOR THE USE OF Venerate XC® BIOINSECTICIDE  
 Brown Marmorated Stink Bug  
 on Apples, Pears and Stone Fruit  
 Additional instructions on the use of Venerate XC  
 to prevent feeding damage prior to harvest

**Venerate® XC**

EPA Reg. No. 84059-14

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Crop	Target Insect	Application Method	Product Use Rate per Application	Application Instructions
Apple Pear Stone fruit	Brown Marmorated Stink Bug Nymphs and Adults	Foliar (Ground) applications from within 7 days of harvest and during harvest	4 quarts per acre	To reduce feeding damage from brown marmorated stink bug nymphs and adults, apply Venerate XC within 7 days of and during harvest in a minimum of 75 gallons of water per acre with spray equipment designed to achieve full coverage of orchard crops. The use of a non-penetrating spreader-sticker may be used to improve coverage and rain fastness.  Applications are not intended to provide control of the target pest but will inhibit feeding, thereby reduce feeding damage on fruit.
Venerate XC® has a <b>pre-harvest interval (PHI)</b> of <b>0 days</b> . Do not enter or allow worker entry into treated areas during the <b>restricted-entry interval (REI)</b> of <b>4 hours</b> .				

**All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.**

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and carefully observe the cautionary statements plus all the other information appearing on the product label.

**This recommendation must be in the possession of the user at the time of pesticide application.**
