

TECHNICAL INFORMATION BULLETIN
FOR THE USE OF STARGUS® BIOFUNGICIDE
**Water volume for applications to
strawberries**

FIFRA Section 2(ee) Recommendation

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the U. S. Environmental Protection Agency.

FOR USE IN ALL STATES WHERE CROP AND PEST(S) EXIST AND WHERE 2(EЕ) RECOMMENDATIONS ARE RECOGNIZED.

STARGUS®
EPA Reg. No. 84059-28

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Crop	Target Disease	Application Method	Product Use Rate per Application	Application Instructions
Strawberry	Botrytis (<i>Botrytis cinerea</i>)*	Foliar	2-4 quarts per acre	For foliar applications, apply this product preventatively in 50 – 100 gallons of water per acre at 7-10 day intervals as soon as first symptoms of disease appear. Dilute applications. This product can be applied by ground equipment to strawberries in dilute applications of 100 – 250 gallons of water per acre. Avoid excessive amounts of water that result in the runoff of spray material.

* = not labeled for this use in California
STARGUS® has a **pre-harvest interval (PHI)** of **0 days**.
Do not enter or allow worker entry into treated areas during the **restricted-entry interval (REI)** of **4 hours**.

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and carefully observe the cautionary statements plus all the other information appearing on the product label.

This recommendation must be in the possession of the user at the time of pesticide application.
