

MBI's Commitment to SH&E

Marrone Bio Innovations (MBI) is committed to meeting our Safety, Health and Environmental (SH&E) goals and achieving our vision to be the most innovative, respected and responsible leader in our market — sustainable crop management which is safe for people while protecting our natural resources. We believe a strong SH&E performance lays the foundation for a win-win scenario on behalf of our customers, employees and overall business success.

Our company values serve as guideposts on our sustainability journey and are embedded in our commitment to SH&E.

MBI complies with applicable SH&E regulations, having the same expectation for our suppliers and sharing complete information on the safe handling and use of our products with our employees, customers and distributors.

MBI designs and operates our facilities to ensure the safety and security of our employees, contractors and neighbors and minimizing impacts on our communities and the environment.

MBI holds employees and contractors accountable to meet our SH&E standards wherever we operate and partnering with our customers to develop innovative and sustainable solutions.

MBI works on improving energy efficiency, reducing environmental impacts, preparing for emergencies and reporting our SH&E performance.

MBI is committed to holding ourselves and our partners accountable while continuously improving its SH&E performance
